English – C1

German – A1

ABOUT ME

After years of providing support for multiple companies, I have started doing DevOps and I feel like I have finally found my gear. I am running my own homelab in addition to environments at my job, and this role is something I would love to pursue and get better at it.

I spend my free time with my wife and our dog. I am a fan of videogames, tattoos and alternative music. I like to travel or have a good cup of coffee.
